Business Growth Service

The expertise to help you plan for growth;
the support you need to make it happen.

Supporting you to grow your business

Introducing the RfM Business Growth Service

Our Business Growth Service is available to any business that is looking to grow – you don't need to be an existing client of RfM Accountants.

We can support businesses of all sizes by:

- Improving Competitiveness
- Creating new jobs in the local economy
- Business Improvement Planning
- Improving business efficiency
- Driving innovation and technology-led change.

The programme is delivered by RfM Business Consulting working together with your local Business Growth Hub.

How it works

As a first stage, we will work with you to create a Growth Action Plan for your business. This will outline:

- a new business model blueprint
- an implementation roadmap
- a high-level business case
- available developmental funding.

With you as you grow

We can also provide support in the later phases of the plan to help you achieve your desired future business model.

RfM Business Consulting will work with your local Business Growth Hub to secure funding to help produce your Growth Action Plan. If successful, the Growth Hub could pay 40% of the cost up to £2000.

What you can expect

Working in a highly targeted way, we follow a structured process to drive out business improvement plans with minimal disruption to your business.

This process allows us to collect information from you – and to delve deep into the issues you face – to understand what you are seeking to achieve from your business.

Key benefits

- Expert resource to allow you to concentrate on running your business
- External view of your business and growth plans
- Access to matched funding routes

Points to consider...

Are you looking to grow your business?

Do you need help in defining what the growth will look like?

Will you be creating new jobs locally?

Do you want to attract subsidy funding to support your growth?

Do you need support to produce Implementation Plans and applications for funding?
